## EDUCATION

**Vasantdada Patil Pratishthan's College of Engineering**          Mumbai, Maharashtra, India
*B.E. Information Technology Engineering - University of Mumbai*                    *Jan 2021 – Jul 2024*

## EXPERIENCE

**Software Developer**                                                  Nov 2023 – Present
*General Diagnostic International Pvt. Ltd.*            *Onsite – Navi Mumbai, Maharashtra, India*

- Developing and designing new features for the application using Kotlin Jetpack Compose.
- Assemble application designs using figma.
- Constructed Rest Api's on BFF Layer using Dot Net.

**Android Engineer**                                                   Apr 2023 – Nov 2023
*Spare8 Platforms Pvt. Ltd.*                              *Hybrid – Mumbai, Maharashtra, India*

- Migrated the existing framework to MVVM Clean Architecture.
- Handled Application dependencies using Dagger-Hilt.
- Improved application performance from baseline to 30%.
- Exposure to CI/CD Pipeline process with Git Repository.

**Jr. Mobile Application Developer**                                    Oct 2022 – March 2023
*Byasa Tech Solutions Pvt. Ltd.*                          *Remote – Mumbai, Maharashtra, India*

- Integrated existing framework with MVVM Architecture Pattern.
- Migrated Serialization framework from GSon to Moshi.
- Handled offline first database (Room DB) to sync with cloud connectivity periodically.

**Mobile Application Developer Intern**                                 March 2022 – Sep 2022
*Invizio Solutions LLP.*                                   *Onsite – Mumbai, Maharashtra, India*

- Integration and inclusion of new features and REST APIs on the production application.
- Hands on with hardware device integration with application using Bluetooth.
- Identification and debugging of the bugs on the production application.

## SKILLS

| | |
|---|---|
| **Languages** | : Kotlin, Java, Dart, Python. |
| **Libraries/ Frameworks** | : Jetpack Compose, Dagger-Hilt, Koin, Retrofit, Coroutines, Flow, Paging 3.0, Coil, Rx-Java, Flutter. |
| **Databases** | : Room DB, Object Box (No SQL), MongoDB, Postgre SQL, Firebase. |
| **Architecture** | : Clean Architecture, MVI, MVVM. |

## PROJECTS

**Cradle Care Frontend**          *Technology Used: MVVM, Razor-Pay, Dagger-Hilt, Firebase Auth, Retrofit, Material 3.0*          Source Code

- Designed and developed a pre-delivery healthcare Android app frontend in Kotlin.
- Implemented RazorPay UPI payment gateway for seamless user payments.

**Cradle Care Backend**          *Technology Used: KTOR, PostgreSQL, Routing, Session Handling .*          Source Code

- Designed and developed a Kotlin-based backend for a pre-delivery healthcare Android application using the KTOR Framework.
- Stored the data of user in Postgre SQL Database.

**B Fit**          *Technology Used: Kotlin, Navgation Component, Firebase Google Auth, Lottie Animation, Coil Lib*          PlayStore Link

- Designed and developed a Fitness application for fitness freaks providing best workout plans and high quality diet from experienced dietitian.
- Utilized responsive design to ensure compatibility across all devices.
